SKILLS

- Git, GitHub, Jira, Confluence, OKTA
- SQL, MySQL, MariaDB, PostgreSQL, SnowflakeSQL, BigQuery
- AWS, Bitbucket, Jenkins, Gitlab, Github Actions
- Java, JavaScript, HTML, CSS, Tailwind, Python, PySpark
- React, Svelte, Node, Django, Spring Boot
- Linux, Unix, MacOS, Android, Windows
- R, Tableau, Excel, Google Sheets
- Leadership, Dedication, Observation, Adaptability, Communication

EXPERIENCE

Con Edison

Systems Analyst | Data Engineer

July 2024 - Present

- Analyze complex systems and data infrastructure to optimize performance and efficiency
- Design and implement data pipelines for improved data processing and analysis
- Collaborate with cross-functional teams to identify and resolve technical issues
- Create comprehensive documentation for systems, processes, and data flows
- Utilize SQL, Python, Databricks, and other relevant technologies for data manipulation and analysis
- Contribute to data governance initiatives and best practices
- Assist in the development of data-driven solutions to support business objective

Capital One

Data Analyst

July 2022 – March 2023

- Incorporated Databricks and Apache PySpark/Spark to query data from Snowflake to provide effective financial information.
- Utilized Internal tool to transfer data to Business Analysts and various Business Units within the corporation.
- Transformed and Sorted data using Snowflake SQL to send to 1.3 million users.
- Leveraged AWS S3 buckets for error logging with Github Actions
- Debugging code, addressing last-minute errors, customizing applications at short notice, and providing Software-as-a-Service(SaaS) solutions.

Ally Financial

Data Engineer

November 2021 – July 2022

- Developed and maintained Snowflake Data pipelines, ensuring reliable data integration and smooth data flow for analytics and reporting.
- Utilized Linux, Apache Maven, and Gitlab to transfer repositories for VCS and builds from Jenkins and Bitbucket which contributed to increased productivity and faster time-to-market.
- Refactored data in Apache Nifi to improve data flow which was used to improve data maintenance.
- Modified code within the Spring Boot Backend to improve code coverage which reduced defects in production and improved testability.
- Rapidly deployed customized Software-as-a-Service solutions on demand for clients, leveraging extensive SaaS capabilities to enable tailored solutions that address unique needs

American Museum of Natural History and Science

Membership: Point of Sale

December 2016 - March 2020

- Provided exceptional customer service as a membership facilitator and point of sale agent at the American Museum of Natural History (AMNH)
- Successfully converted 50 to 100 new museum members per month through effective communication and persuasive sales techniques
- Handled cash and credit card transactions accurately and efficiently in a high-volume environment
- Demonstrated strong interpersonal skills while interacting with diverse visitors and addressing inquiries or concerns
- Promoted museum offerings, explained membership benefits, and effectively communicated value propositions to prospective members
- Maintained a thorough understanding of museum policies, pricing structures, and membership packages to ensure accurate information delivery

- Collaborated with team members to achieve sales targets and provide a seamless visitor experience
- Exhibited excellent problem-solving abilities and remained composed in high-pressure situations

PROJECT

QC Prof Stat Data Visualization Project

Winter 2020

- Developed a responsive web application using React to visualize grade distribution data for professors at Queens College
- Implemented interactive data visualization techniques, including bar charts to effectively communicate grade patterns and trends
- Integrated with a MySQL database deployed on AWS RDS to securely store and retrieve grade data for efficient analysis
- Leveraged AWS S3 for scalable storage and delivery of static website assets, ensuring reliable performance and cost-effectiveness
- Deployed the application to an AWS EC2 instance, enabling seamless access for faculty and administrators to explore grade distribution insights
- Documented the codebase, deployment process, and maintenance procedures to facilitate future enhancements and knowledge transfer with colleagues

Certificates

- Google Career Certificate: Google Data Analytics

EDUCATION

Queens College

Bachelors of Arts in Computer Science

December 2020
